

Take care of yourself!
CANCER PREVENTION & SCREENING
Give yourself the best chance
of remaining in good health.

SOME PREVENTION RECOMMENDATIONS

-  No smoking. Do not consume any form of tobacco and avoid passive exposure to tobacco.
-  Maintain a healthy weight.
-  Do enough physical activity.
-  Eat a healthy diet.
-  Limit your consumption of alcohol.
-  Avoid excessive sun exposure, use sunscreen and do not use tanning equipment.
-  Protect yourself from carcinogens by following health and safety instructions.
-  Check your exposure to radon gas emissions in the home, and take action if necessary.
-  Vaccinate your children against hepatitis B (newborns) and against the Human Papilloma Virus (HPV) (young girls).
-  Take part in organised screening programmes for the following three conditions (as a minimum):
 - colorectal cancer,
 - breast cancer,
 - cervical cancer.

Coordinating Physician for the Cancer
Prevention & Screening Clinic

REASONS FOR PREVENTION & SCREENING

At present, not all cancers can be avoided. Nevertheless, you can take action against cancer. Prevention enables the risk of cancer to be reduced by about 30%.

Screening allows the detection of a series of cancers, often at an early stage, and often even before any symptoms are apparent. Treatments are more effective then, and the chances of a cure are greater.

For certain cancers, screening also makes it possible to identify pre-cancerous cells, which can be treated in order to stop the development of cancer.

CANCER PREVENTION & SCREENING CLINIC

A consultation at the Cancer Prevention & Screening Clinic enables a risk profile to be established and a series of examinations and specialist consultations to be recommended.

Our specific characteristics:

- Consultation open to anyone, with or without a specific cancer risk factor.
- High-quality, multi-disciplinary personalised prevention and screening plan based on your risk profile.
- Organisation of a 'screening circuit' consisting of a series of examinations and specialist consultations.
- The results are centralised and forwarded to your attending physician(s).
- Affordability and cost transparency objectives.

IN PRACTICE

GENERAL PRACTITIONERS SPECIALIST PHYSICIANS SPONTANEOUS REQUEST

1

1st 'cancer screening' consultation

- Standardised medical questionnaire
- Personal and family medical history
- Clinical assessment
- **Recommendations according to risk profile**

🕒 1h
